

Parkster is your portable parking meter

There are no extra fees when parking using Parksters app!

Parkster imagines a world without parking tickets, a world without waiting times and a world without expensive guesstimates of required parking time, a world where you carry around the parking meter in your pocket!

In case you don't have a smartphone or simply don't want to download the app, you have the opportunity to use Parkster SMS- or IVR-service.

The parking attendants are able to see if you've paid through their handheld computers by looking up your car's registration number. Parking fees are payed in arrear monthly by a payment method of your choice, credit card or invoice.

The App

You are in full control with Parkster's app

Parkster's app is the smartest choice if you want full control over your parked time. The app has you, the user, in focus and is super easy to use. It lets you handle your parking wherever you're at, without any extra fees.

All you have to do to get started is to download the app, create an account and then start parking, no sticker or such is required!

Parkster's app is free and available on iOS, Android and Windows.

How it works

Account

To create an account you download our app for free on your smartphone. Click "Create account" to register your personal information.

Car and parking slot

When you park you choose which car you'll be using. Then you specify the parking spot with the list found at "Parkeringar nära dig" on the app. After choosing parking spot you'll receive more information about it, fees for example.

Start parking

You start parking when you've chosen a car. Every parking you do have an automatic stop time, in case you forget to stop your parking. This is not only a safety for you but it also means that you no longer have to spend time calculating how much time you have to pay for. The stop time is a safety function if you forget to stop your parking and you can choose its length yourself. You can extend your parking with the app whenever you wish, no matter how far away you are from your car!

Stop parking

When you've run your errands and have returned to the car you stop the parking with a simple push of a button. This way you only pay for the actual time spent parked, without unnecessary fees. Using our app is free of charge. You can access your parking receipts by logging onto your account on our webpage.

SMS

Text your way to a simpler parking solution

Parkster's specially developed SMS service is a flexible alternative that fits everyone that wants a simple parking solution, without any extra charges arriving on your phone bill at the end of the month.

You simply check in when you arrive to the parking spot by sending a text message, to just as easily check out when you're done. You only pay for the time you're actually parking, no pre created account necessary!

How it works

Start parking

You start by texting:
"Zone code Registration number Personal Identity Number" to 0707-13 14 15.
Example: 12345 ABC123 7106061337

Please note that your SMS-parking is only active from when you've received the answer-receipt on your phone.

The zone codes can be located on sign around the parking lots. The parking fee is simply payed at the end of the month by invoice.
Your first time parking with SMS is the only time you need to send your personal identity number, thereafter it's enough with just the zone code and car registration number.

Stop parking

When you want to stop parking you text the word "Avsluta" to 0707-13 14 15.
Example: Avsluta

You'll then receive a confirmation text on the parked time, containing an overview on total time parked and the total fee.

Automatic stop time

To protect you from forgetting to stop your parking, we have pre-set an automatic stop time for you. The stop time can be seen on the confirmation text you received and if you don't stop your parking before it activates you'll get a SMS asking if you wish to extend the time. Your parking expires if you don't text "Förläng".

SMS

Automatic stop time continued

Would you like to set the automatic stop time yourself? Just tell Parkster how many hours you'd like for stop time by sending a text containing:
Zone code Car Registration Number [Hours of stop time].

In other words you set the amount of hours last. Three hours as automatic stop time would for example be:

12345 ABC123 3

You would then be parked in zone 12345 with a stop time of three hours. It's still possible to extend or stop the parking whenever you want, you're not pledged to three hours. The stop time only minimize the eventual extra time that you have to pay for if you forget to stop the parking.

Extend parking

You extend your parked time by texting "Förläng" to 0707-13 45 15.

If you extend your parked time you'll receive a message containing your new stop time. You can extend the stop time whenever you want and how many times you wish. As well as stop parking at any time, regardless your stop time.

Create a subscription using SMS

You can start a subscription so that your monthly parking subscription automatically gets renewed. For this you'll need a valid monthly subscription. You can get this by texting "Month Zone Code Registration Number" to 0707-13 14 15.

Example: MONTH 12345 ABC123

Next send the word "MA" and get a confirmation on that your subscription has been activated. Your subscription will later automatically renew the monthly parking for you when the current ticket expires.

A subscription can be cancelled by texting the word "AVBRYT" to 0707-13 14 15
