

LUNDS
UNIVERSITET

Vice-Chancellor

DECISION

18 December 2003

Reg no I F 79
6297/02

Regulation for fire safety training at Lund University

According to the “Work environment policy for Lund University including targets and action plans for the period 2003–2005” adopted on 9 January 2003, one of the targets was that “All staff will undergo fire safety training”. The Division of Buildings was made responsible for producing a regulation for meeting this target. The present proposal has been reviewed by the health and safety committee which recommends that it is adopted.

It is hereby decided that the following proposal for a regulation regarding fire safety training for Lund University is adopted.

Regulation:

All staff shall have undergone training within a 5-year period.

The training is thereafter to be repeated within the next 5-year period.

A decision on this matter was taken by the undersigned Vice-Chancellor in the presence of the head of administration, university director Peter Honeth, after a presentation by professional hygienist Åsa Gustafson. Buildings manager Lars Lavesson has also participated in processing the proposal.
